Circus Shapes (MathStart 1)

Synopsis

Everyday activities such as sharing a meal, sorting socks, and getting ready for school can be part of learning math. In the MathStart series, everyday life is the basis for each entertaining story. Simple math concepts are embedded in each story so that young children intuitively understand them. Adults can use the creative suggestions for activities in the back of each book to extend learning opportunities with children. Developmentally appropriate and correlated to school grade levels and the curriculum standards of the National Council of Teachers Of Mathematics, MathStart can give children a head start!

Book Information

Lexile Measure: 140L (What's this?)

Series: MathStart 1

Paperback: 40 pages

Publisher: HarperCollins (December 18, 1997)

Age Range: 4 - 8 years

Grade Level: Preschool and up

Customer Reviews

I am a preschool teacher and bought this book for our unit about the circus. Each page includes a shape (or shapes) found at the circus, and the children enjoyed finding and identifying them. I like including math concepts wherever and whenever possible, and books like this certainly help!

Good book. Love how the shapes are all throughout the book. Easy read & age appropriate. (Why do you have to write so much)

The book looks new. It is very clean and arrived a few days after I placed my order. I will use this book in our preschool so it will get a lot of use. Thank you.

Good story for children learning about the various shapes. The circus theme makes it a lot of fun for all children.
