## Customer Reviews

The book is nice, we will use it in our homeschool studies. I will not follow common core standards as the book will, I will teach the subject and use this book as a review tool and learning resource! Thanks so much!

My son loves this workbook a lot! This book is designed to guide parents and children through fourth grade learning. Each activity supports the common core state standards and is the perfect way to develop children's math and language arts skills at his or her own pace. This book includes reading comprehension, phonics, languages arts, grammar, writing, analogies, and math. It also contains colorful games and activities, and pull out mini books. It helps my son develop a solid foundation of basic skills, which further boost his school success. This is also an amazing book for parents' use. The guidance for parents is very useful. Following the guidance, I can now help my son improve his study in these basic skills. When my son takes the online Beestar weekly tests, he often ranks high among his peers. I give credits to this book. Highly recommend.

Better learning books out there. Giving only 3 stars because answer keys are sometimes wrong. Publisher needs to proof better. Example:  $10-2 = 8$ . answer key put 28 as the answer.

Have used similar products throughout the summers for my daughter and really feel this one is the best. It covers a wide variety of skills that should help her immensely.

Easy for parents & students with a decent price!
