# My First ABC (My 1st Board Books)

## Synopsis

Teach your preschool child numbers and encourage learning while reading and having fun together with your My First: ABC board book, designed to be a toddler favorite and withstand wear and tear from a preschooler. My First: ABC uses pictures of objects illustrating each letter of the alphabet, from A to Z, and includes clear word labels as well. Develop your child's early learning with My First books, specially designed to captivate a preschooler's attention while laying a foundation for learning. My First books feature bold, bright photographs on white backgrounds â ideal for catching a young child's eye and acting as an introduction to early-learning topics. The collectible My First board books make a great early-learning library and include a wide variety of topics including trucks, animals, colors, letters, numbers, and first words. My First board books feature a simple point-and-say layout that builds confidence in children through repeatability and encourages preschool vocabulary and language skills. The board book format is durable and easy for young children to hold and carry on their own, and they're designed to hold up to the rough handling that comes with being a toddler's favorite book to "read" alone or with a parent.

## Customer Reviews

BUY IT. Trust me. I have a library of over 200 children's books for my son, age 2. I was stunned at what an excellent item this is when we received it! He is only two but he knows his letters, so I

thought the ABC board book would be a good fit for him. I had no idea! It was neat that he'd learned his letters already, but now I can ask him, "James, what letter does "airplane" start with?" and get the right answer. He knows DOZENS of these, thanks to this book! We love a great read and that is how we enjoy one another's company much of the day. This isn't a "Mommy, read it!" book. It's an "I'll let you sit on my lap and I'll hold the book so you can build your brain while I rest book." I love a book that I DON'T have to read just as much as one I do have to read. :) My son sits calmly on my lap, picking through the pages and pointing to realistic pictures of items, while telling me what each one is called. It's excellent for vocabulary building. It helps him build confidence in his ability to "read." And it has shown him that letters (shown on the pages for the words shown that begin with them,) MEAN something. This is one of those books that I think everyone should have. It will be part of my future baby gifts from here on out. (I like to give books because no one else does and they are the single best building block to education that I can provide to the child, as someone outside the home. Plus, they last forever compared to baby clothes!) I really encourage you to add this item to your home library. Your child will benefit from it immensely and you will both enjoy "reading" it. ;)

My toddler (23 months) currently loves books with lots of photos of objects and animals for him to learn the words for, so I thought he'd love this book since it has more than one picture for each letter of the alphabet. However, this book almost has too many pictures and is overwhelming for some kids -- the letter B has 14 pictures on a two-page spread! My son usually just looks at the first few pages, points out the objects he recognizes and says the word, then loses interest long before we reach the end. I think this book would be better if there were only 2-3 pictures per letter. (Some less common letters, like Q and Z, do only have 2-3 pictures.)

This isn't our first my 1st Board Book and it definitely won't be our last. The books are sturdy and can withstand my enthusiastically and unintentionally rough two year old as he throws them around and bends them every which way. The pictures are bright and engaging so it gets my toddler asking questions about new things and excitedly pointing out the things that he knows/recognizes. Every letter has a handful of different pictures to talk about and we can discuss the letter sounds and what they look like.

I love this book because it made learning the alphabet very fun for my daughter, for whom this book was an obsession for several months. If she saw it, she would stop whatever she was doing to look at it. By 13 months, she could tell me the names of all of the letters. The size is perfect - large

enough for a baby to easily manipulate but small enough to fit in a baby's lap. The pages are very sturdy, and have held up very well. The pictures are very bright and colorful, making it very interesting for little ones. I don't give the book 5 stars because I feel that some improvements could be made. First of all, some of the photos are a little grainy. Also, in many instances pictures of toys are used instead of the real thing - for instance, the photo of an ambulance is a toy, and for that matter, it's an old-fashioned ambulance, the likes of which I have never seen in real life. Other pictures are ambiguous - like the "ink" that is in a jar. For a small child who does not understand the concept of ink, if I show her that photo of the jar of ink, she might think that I was referring to the container. Perhaps they could replace the ink with an igloo. Igloo seems a little more straight-forward. Also, the angle from which the plate is photographed...every time my daughter sees it she says, "O". It just looks like two concentric blue circles on the page. Overall, however, it's a very beautiful book, and despite some minor flaws, it has seen more action than any toy in our toy box.

My 15 month old LOVES this book. The whole "my first" series has been a hit, but My First ABC takes the cake! He can already point out about a third of the photos when I ask him, and loves pointing at the photos to hear the words that he doesn't know yet. He gets so excited to show us the aaaypay (airplane) and ball, and brings this book to anyone who will read it with him.

This book is awesome! We had to get another because his first 100 words book is starting come apart. He has always loved his books and the photos and letters in this book are more realistic so when we go outside or play around the house he points and tries to say the words. Can't quite say umbrella but he covers his head and says raaaain! lol.

By the time my son was 18 months old, he knew all the letters in the alphabet in part due to his obsession with this book. We just bought another copy for our new baby. It's extra great because big brother can "read" it to him (really he just points to the picture and says the name of the thing).
