Grade Level: Preschool and up

## **Customer Reviews**

This book provides information that kids love and is great for ESOL students. My students often have a hard time getting information from a source they can actually read. These books help. I'm sure younger readers love them too.

I love Usborne Books. I am hoping to someday own every one of them. They are great and they are truly helping my kids learn better and faster. They are great books and I highly recommend them, no matter where you get them. Thank you so much.

Arrived as expected - slightly worn and on time. Thank you!

We bought this to follow along with Susan Wise Bauer's recommendations for 2nd grade science (from Well-Trained Mind). The only issue is that we've gone through most of the topics before. With

all the books we've gotten from the library by the time 2nd grade hit we found these kind of boring. For a first encyclopedia it works great - nice pictures, simple writing. For now, my 5 year old reads it for his science lesson and tells me something he read - my 7 year old is pretty bored with it.
